**THE FOLLOWING QUESTIONS WERE ASKED BY VENDORS DURING THE QUESTIONS/COMMENT PERIOD:**

---

**Q1:** What is the anticipated schedule for bidding and construction of this project?

**A1: The County/Commission anticipates issuing a Notice to Proceed for professional architectural, engineering, and project management services on or around January 26, 2027, following consultant selection and contract award.**

**The construction bidding and implementation schedule will be developed in coordination with the selected consultant following completion of site assessments, design, permitting, and preparation of the construction bid documents. The County/Commission intends to advance the project as expeditiously as practicable; however, specific construction advertisement, award, and completion dates have not yet been established. The schedule will be subject to design requirements, site-specific conditions, necessary approvals, funding availability, and applicable procurement requirements.**

**Q2:** Would the Geotechnical, Special Inspections, and Materials Testing services be required to be included under the CM firm's or A&E firm's proposal, or will there be a separate opportunity to submit proposals for these services at a later date?

**A2: The County/Commission anticipates selecting one qualified firm to provide the architectural, engineering, project management, and construction administration services identified in the RFQ.**

**Geotechnical investigations, special inspections, and materials testing may be necessary depending on site-specific conditions, foundation requirements, and the final design. The extent of these services has not yet been determined. Proposing firms should identify any anticipated need for these specialized services in their qualifications and describe their ability to provide or coordinate such services, including through qualified subconsultants where appropriate. The County/Commission reserves the right to determine whether specialized services will be incorporated into the selected consultant's negotiated scope of work or procured separately, as necessary. No separate solicitation for these services is currently established under this RFQ.**
